Naturesactiv®

Natural Bio actives I Standardized I Zero-Waste Impact

From Phytogenic Potential to Species-Specific Solutions

POULTRY PERFORMANCE
BROILERS | LAYERS

BROILER - Growth • FCR • Livability

LAYER - Egg Mass • Persistency • Shell Quality

- **Nutrition** - nutrient density, digestibility and feed quality
- **Gut & microbial balance** - intestinal integrity and pathogen pressure
- **Environment** - heat stress, humidity, housing and ventilation
- **Water** - availability, quality and hygiene
- **Disease pressure** - pathogen challenge and biosecurity
- **Metabolism & immunity** - nutrient utilisation, liver function and immune response
- **Production objective** - growth and FCR in broilers; persistency, egg mass and shell quality in layers

THE POULTRY SOLUTIONS

Naturesactiv®

Gut Performance

Enteric Defence

Gut Protection

Liver Function

Stress Resilience

Rapid relief

Respiratory Support

Performance Recovery

Egg Laying Quality

CocciShield™ - ENTERIC DEFENCE

INGREDIENTS

Oregano Essential Oil	Carvacrol
Chestnut Wood Extract	Hydrolysable Tannin
Garlic Essential Oil	DADS & DATS
Turmeric Essential oil	Turmerones

APPLICATION

Oil top-dress or controlled feed mixing

Homogenize and distribute uniformly.

Dosage

- 500 g/T - Routine
- 1 Kg/T - Increased Challenge
- Up To 2 Kg/T - Higher-intensity Challenge

KEY BENEFITS

- Supports microbial balance and intestinal function
- Complements nutritional management during enteric challenge
- Support normal function of the Gut and physiological resilience during challenge pressure.

FORMAT – Functional Oil & AquaSol

Phytogenic Nutritional Support For Poultry During Periods of Enteric and Coccidial Challenges.

Respivon™ - RESPIRATORY SUPPORT

INGREDIENTS

Eucalyptus Essential oil	1,8-cineole
Peppermint Essential oil	Menthol
Garlic Essential Oil	DADS & DATS
Turmeric Essential oil	Turmerones

APPLICATION

- Liquid concentrate for drinking-water application
- Mix in a controlled manner and distribute uniformly.

DOSAGE

1 mL/L • Routine support
2 mL/L • Increased challenge
5 mL/L • Higher-intensity situation

KEY BENEFITS

- Supports respiratory-health management during environmental challenge
- Complements the bird's physiological response under challenging conditions

FORMAT – AquaSol

Multi-pathway Botanical Support For Respiratory Health and Physiological Resilience in Poultry.

Enercept™ – DIGESTIVE AID

INGREDIENTS

Turmerone - Rich Turmeric Essential Oil

- Ar-Turmerone
- α- and β-turmerone

APPLICATION

Oil top-dress or controlled feed mixing

Homogenize and distribute uniformly.

DOSAGE

500 g/Ton Feed - Preventive Gut Support
1kg/Ton Feed - Performance Improvement

KEY BENEFITS

- Supports gut stability and digestive balance
- Supports nutrient utilization efficiency
- Helps maintain feed consistency during stress conditions

FORMAT – Functional Oil , Functional Powder & AquaSol

Support Digestive Balance and Nutrient Utilization in Poultry.

TriGut™ - GUT PROTECTION

INGREDIENTS

Garlic-derived Organosulfur System	Allicin, DADS, DATS
Turmeric Functional Oil	Ar-turmerone, α-turmerone and β-turmerone

APPLICATION

Mix uniformly into complete poultry feed, including mash and pelleted feed.

DOSAGE

- 500 G/Tonne - Regular Use
- 1 Kg/Tonne - Increased Physiological or Environmental Stress

KEY BENEFITS

- Supports normal gut function and digestive processes
- Supports droppings consistency and drier litter goals
- Supports consistent production performance

FORMAT – Functional Powder

Supports Gut Stability From Foregut To Hindgut As Part of An Integrated Poultry Nutrition Programme.

HepatoShift™ - LIVER FUNCTION

INGREDIENTS

Andrographis Extract	Andrographolide
Turmeric Functional Oil	Turmerones
Moringa Powder	Flavonoids
Fenugreek Powder	Saponins & Trigonelline

APPLICATION

Intended for poultry nutrition as part of a broader nutrition and management programme

DOSAGE

500 g/Tonne of Feed

KEY BENEFITS

- Supports normal liver function and metabolic activity
- Supports bile activity and fat digestion
- Helps maintain efficient nutrient utilization

FORMAT – Functional Powder

Support for Hepatic Function, Lipid Metabolism and Metabolic Efficiency In Poultry

Adaptix™ - STRESS RESILIENCE

INGREDIENTS

***Phyllanthus emblica* Extract**	Phenolics & Hydrolysable Tannins
Moringa Leaf Extract	Flavonoids
Turmeric Functional Oil	Ar-turmerone, α-turmerone and β-turmerone

APPLICATION

Mix uniformly into complete poultry feed, including mash and pelleted feed.

DOSAGE

Routine Environmental Stress: 500 g/MT

Elevated Environmental Or Production Stress: 500–1,000 g/MT

KEY BENEFITS

- Supports physiological adaptation and antioxidant balance during environmental and production stress.
- Helps support feed intake and normal bird activity during challenging conditions.

FORMAT – Functional Powder

Botanical Support For Stress Adaptation, Antioxidant Balance And Sustained Poultry Performance.

LayActiv™ – LAYER PERFORMANCE

Lay Activ™

INGREDIENTS

Withania somnifera	Withanolides
Phyllanthus emblica	Hydrolysable Tannins
Moringa oleifera	Phenolics & Flavonoids
Turmeric Essential Oil	Turmerones

APPLICATION

- Incorporate into complete layer feed.
- Use within an integrated layer nutrition programme.

DOSAGE

- Routine Programme: 500 G–1.0 Kg/MT
- Peak Production / Elevated Stress: Up To 1.5 Kg/MT

KEY BENEFITS

- Supports metabolic resilience and cellular redox balance during sustained laying demand.
- Provides botanical nutritional support for physiological functions associated with sustained production

Format – Functional Powder

Botanical Support For Metabolic Resilience During Sustained Laying Demand.

Naturesactiv®

Rapid Mixer Granulator (RMG)

Electric Heating Kettle (Jacketed Kettle)

Liquid Mixing Tank (with Agitator)
